The Best in Services and Opportunities

Since our founding in 1983, our mission has been to provide the best in services and opportunities for both our clients and our dedicated brokers. Our firm commitment to client and workplace satisfaction has enabled us to bring success, stability and balance to not only our clients' investment portfolios, but to our team and our company's reputation as well.

We provide the independence, flexibility, and support that has gained the trust of our clients and registered representatives since 1983 and are dedicated to helping our brokers provide the best service to their clients. Flexible production requirements, no proprietary products, full and part-time brokers, top-notch support.

Focused on Your Goals and Objectives

Quest Capital Strategies is unique within the broker-dealer industry in that we do not carry proprietary products for our representatives to sell. Our registered representatives focus on the investment opportunities that best suit their clients' goals and objectives. Our Clearing firm product menu includes a mutual fund system featuring more than 3,000 funds, a comprehensive no-transaction-fee program, and periodic investments and withdrawals. Our Clearing firm is the custodian for a variety of Retirement Plan accounts and offers Quest Capital access to asset management accounts, fee-based managed money programs, equity research and flexible electronic funds transfer services.

"I was very pleasantly surprised at how well the paperwork flowed. The
