PENINSULA PACIFIC

Peninsula Pacific acquires controlling interests in and actively manages businesses in the consumer and industrial sectors that we believe will yield superior return on investment and create long term value for our shareholders.

We operate as a private holding company that capitalizes, restructures, and ultimately builds meaningful businesses, in partnership with management, over an indefinite time horizon.

Peninsula Pacific works with management to identify capital solutions to complex situations for businesses with sustainable advantages. Our structure provides us with permanent capital that allows for efficient consummation of strategic transactions and provides our subsidiary companies ongoing access to substantial growth capital unconstrained by artificial timing restrictions. We continuously evaluate strategic alternatives and assess the appropriate individual course of action for each of our companies, always with a view towards maximizing long term shareholder value.
