

AMERICA IS IN THE MIDST OF AN ENERGY REVOLUTION.

By capitalizing on American technology, ingenuity, and frontier spirit, the Shale Revolution—driven by horizontal drilling and fracking—is turning the world's energy markets upside down.

[ABOUT THE FUND](#)

ABOUT US.

SL Advisors manages separately managed accounts, a mutual fund and an exchange traded fund, all invested in energy infrastructure. SL Advisors believes America's best days are still ahead, thanks in part to Energy Independence. SL Advisors is dedicated to identifying the opportunities this creates, on behalf of its investors. The partners manage the substantial majority of their personal assets alongside those of their clients, ensuring shared outcomes and a true alignment of interests.

Before investing you should carefully consider the Fund's investment objectives, risks, charges and expenses. This and other information is in the prospectus. Please read the prospectus carefully before you invest. You can obtain a free hardcopy of the prospectus by calling 800-617-0004 or visiting www.usaief.com/prospectus. Read the prospectus carefully before investing.

Investing involves risk, including the possible loss of principal. Shares of any ETF are bought and sold at market price (not NAV) and may trade at a discount or premium to NAV. Shares are not individually redeemable from the Fund and may be only be acquired or redeemed from the fund in creation units. Brokerage commissions will reduce returns. The fund is non-diversified and may invest more assets in a single or smaller number of stocks than a diversified fund and be more exposed to individual stock volatility than a diversified fund. The concentration of the fund may make it susceptible to an increased risk of loss more than the market as a whole. If the fund were to fail to qualify as a RIC (Regulated Investment Company), the fund would be subject to tax on its taxable income at corporate rates, and distributions from earnings and profits would generally be taxable to fund shareholders as ordinary income. Changes in tax law could adversely affect the fund or the securities in which it invests. The fund invests primarily in energy infrastructure companies that are subject to risks including but not limited to changes in energy prices, differences in exchange rates, production and exploration, regulation, environmental and severe weather conditions. Investments in MLPs are subject to the risks of energy prices, demand and volatility of commodity investments. MLPs may be

involve political, economic and currency risks, greater volatility and differences in accounting methods. Investments in smaller companies involve additional risks such as limited liquidity and greater volatility than larger companies. As with all index funds the performance of the Fund and its Index may differ from each other for a variety of reasons. For example, the Fund incurs operating expenses and portfolio transaction costs not incurred by the Index. In addition, the Fund may not be fully invested in the securities of the Index at all times or may hold securities not included in the Index.

The American Energy Independence Index uses a proprietary, rules-based methodology to measure the performance of a portfolio of U.S. and Canadian exchange-listed equity securities of companies that generate a majority of their cash flow from certain qualifying “midstream” energy infrastructure activities. An investment cannot be made directly in an index.

The American Energy Independence ETF is distributed by Quasar Distributors, LLC.
