Authentic Investing

The true essence of investing is not what you hear from the financial media or in the marketing campaigns from large Wall Street firms. Aggressive trading and hot stock tips generally result in losses or sub-par investment gains. Rather, real investing is about discipline, patience, and smart, deliberate strategies. We strip away the hype and focus on what is real.

Straight Shooters

Armbrust is a German word meaning "crossbow". In medieval times, an armbruster was an archer or soldier armed with a crossbow. We don't find much use for crossbows in our current occupation, but just like our ancestors, we aim to be straight shooters in all our dealings.

Prospect of Lean Returns For Stocks, Bonds Suggest Getting Creative (<https://www.armbrustercapital.com/prospect-of-lean-returns/>)

Most investors have a mix of stocks and bonds in their portfolios. Stocks are there for long-term growth, whereas bonds are generally purchased for stability and income generation. This has worked out pretty well historically, as stock returns averaged over 10 percent annually since the 1920s, and bonds have yielded over 5 percent, according to Ibbotson data. A balanced portfolio of 60 percent in stocks and 40 percent in bonds has become the de facto standard for many investment portfolios, as the returns have been substantial enough to meet most investors' returns, while keeping risk in check.

At This Stage of Economic Expansion, Is It Like 1996 or 1999 (<https://www.armbrustercapital.com/economic-expansion/>)

In a recent interview with CNBC, famed investor Warren Buffett marveled at the current economic environment. He noted that unemployment is at multi-decade lows and the federal budget deficit is at an all-time high, yet inflation and interest rates are historically low. No economics textbook, in Buffett's estimation, could have predicted such an environment.
