

## What We Really Do.

Oxbow investors are people with significant wealth. In many cases, they have had liquidity events such as selling a business or inheriting assets. With any liquidity event comes significant decisions.

Decisions that need to be made with people who have extensive hands-on experience. Our investors and portfolio managers understand the difference between making money and keeping money.

*"I know exactly what you're going through. I've talked to over 2,000 business owners over the last 30 years."*

Ted Oakley  
Managing Partner
