**Moon Capital Management LP is a
global alternative investment advisory firm
headquartered in New York**

About

Moon Capital Management LP ("Moon Capital") is an independent global investment management firm founded in April 2005, with origins dating from April 1997. The firm is headquartered in New York with a research and trading office in Singapore.

We follow a fundamental equity long/short investment strategy in global equity markets, especially emerging and frontier markets. Our objective is to generate superior risk-adjusted absolute returns across market cycles, with relatively low volatility and a low correlation to equity market indices. We employ a low net exposure to markets and sectors, and aim to generate alpha from a diversified portfolio of individual stocks. Our investment approach is founded upon detailed research of individual companies. We have over 20 investment professionals who are organized in teams with an industry sector and/or regional focus. We have multiple PMs, each of which heads a sector, who work under the company founder, John Moon.

As an investment adviser registered with the U.S. Securities & Exchange Commission, additional information regarding Moon Capital is available at adviserinfo.sec.gov.

Careers

Moon Capital is growing its business and seeking to add to its team of talented professionals. If you have a passion for investing, an entrepreneurial spirit and are interested in joining a dynamic global investment advisory firm please contact us.

Employment opportunities can exist in all areas of the firm including for research analysts, technology professionals, traders, operations specialists, and investor relations professionals.

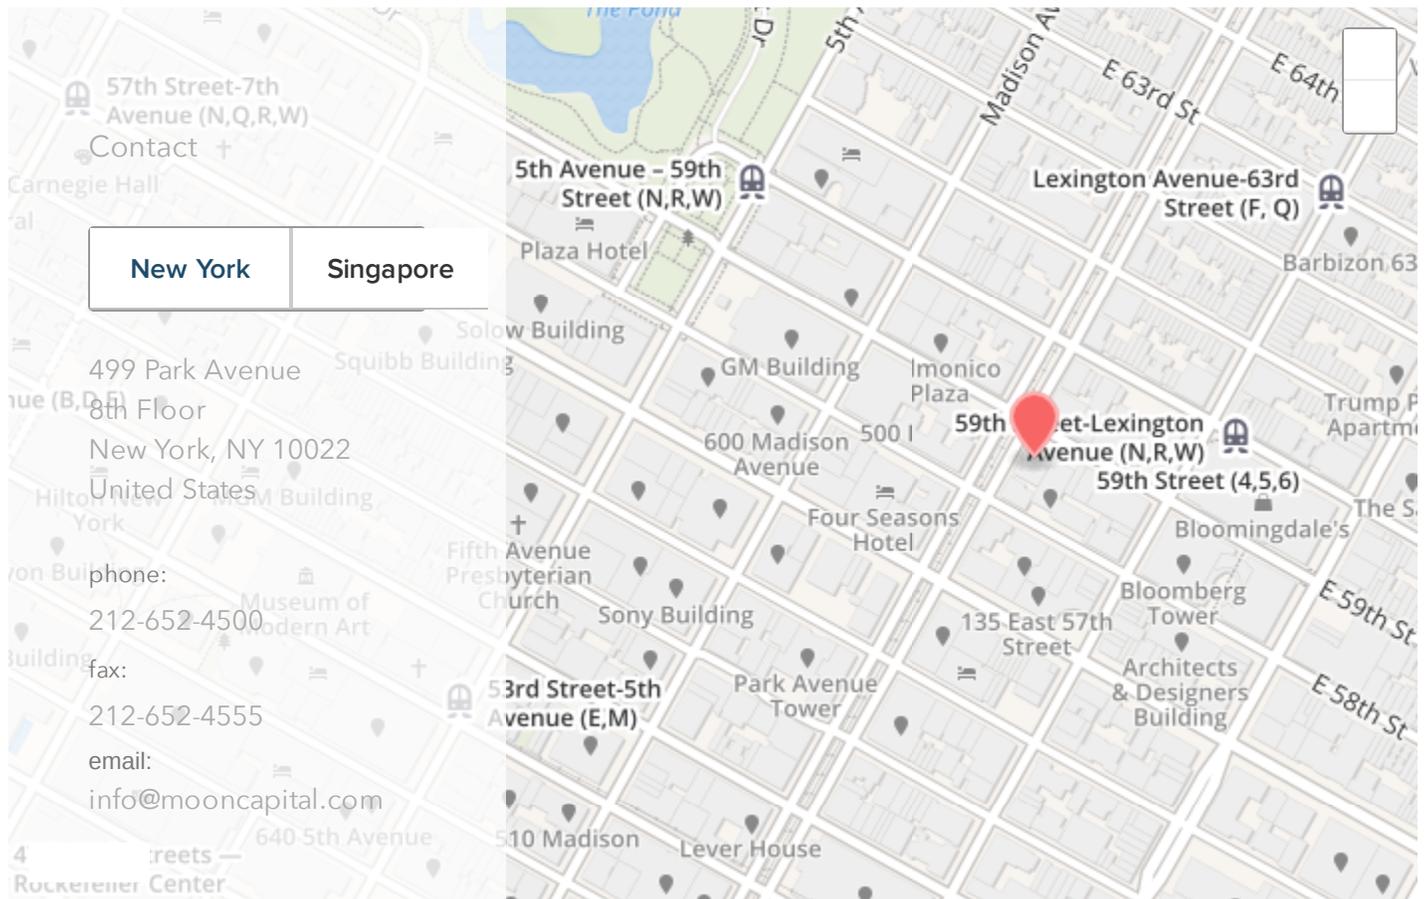

To inquire about positions in our New York office, please email jobs@mooncapital.com.

To inquire about positions in our Singapore office, please email jobsmoonsingapore@mooncapital.com.

Internships at Moon Capital

Moon Capital has an established internship program for undergraduate students, usually during the summer before their senior year, to work in equity research. Interns are assigned to specific projects and are given training to complete models on companies. They are exposed to all parts of the firm and are integrated into the daily work of the research team, including meetings with companies. Our objective is to identify individuals who can return as full time analysts after graduation for a career at Moon Capital.
