

Transforming Manufacturing and Industrial Businesses

ABOUT KPS

One of the World's Leading and Differentiated Private Equity Firms

KPS makes controlling equity investments in industrial companies across a diverse array of industries including basic materials, branded consumer, healthcare and pharmaceuticals, automotive parts, capital equipment and general industrial.

We view ourselves as manufacturers and industrial companies. KPS has over \$5.0 billion of capital under management (as of 12/31/2019). The Firm leverages over two decades of experience to identify and catalyze the creation of world-class, industry-leading enterprises.

KPS creates value for its investors by working constructively with talented management teams to make businesses better. KPS creates investment returns by structurally improving the strategic position, competitiveness and profitability of our portfolio companies, rather than primarily relying on financial leverage.

KPS creates new companies to acquire assets or businesses from large corporations, businesses owned by families or other owners, or businesses presented for sale in connection with financial restructurings, including companies owned by former creditors. KPS transforms these businesses into independent, world-class, industry-leading enterprises.

KPS is a creative and trustworthy counterpart, capable of moving quickly, efficiently and confidentially. KPS' extensive experience demonstrates its ability to execute highly complex acquisitions on a global scale, and successfully operate large industrial companies. KPS takes pride in its constructive approach with all stakeholders, including management teams, customers, vendors and the communities in which its companies do business.

KPS owns and invests in a small number of portfolio companies and each investment is critical to the Firm's success. KPS works in partnership with its portfolio company management teams, who share in any wealth creation resulting from its investments.
