# Manifold Partners

Providing sophisticated investors with  
asset management solutions

[LEARN MORE](#)

---

Manifold Partners is a Systematic Asset Manager. We use prediction science, AI, and ML, applied in a proprietary manner, to predict equity prices for mid and large cap equity in nine countries. Today, our primary product is EMN. Our science can be applied to long only and to other products for which 'big data' is available. Our goal in each of our strategies is superior, risk-adjusted returns from diversified portfolios that are not correlated to any style, factor, or market.
