

DyTegic® Global Index

Overview

Dynamic + Strategic = DyTegic®, is a risk-managed, globally diversified, rules-based index utilizing quantitative analysis to mathematically navigate global economic and market conditions.

The index is engineered to participate in up markets and limit participation in down markets. It may be highly concentrated and may move substantially among asset classes, and therefore, may experience substantial volatility. Index positions (ETFs) are reconstituted quarterly. There is no assurance the objective will be met. No strategy can guarantee a gain or promise against loss.

The following disclosures are an integral part of the above presentation and should be reviewed in conjunction with the above information.

Luken Investment Analytics, LLC ("LIA") is registered with the Securities and Exchange Commission ("SEC") as an Investment Adviser. Registration does not constitute an endorsement of the firm nor does it indicate that the adviser has attained a particular level of skill or ability. LIA provides non-discretionary subscription advisory services to other registered investment advisers and investment adviser representatives and does not provide advice to underlying clients of those firms and representatives to which it provides subscription services. LIA provides discretionary advisory services to retail clients of LIA.

The indexes are designed by LIA unless otherwise noted. Information presented herein is for educational purposes only and does not intend to make an offer or solicitation for the sale or purchase of any specific securities, investments, or investment strategies. Investments involve risk and are not guaranteed. This information does not address individual situations and should not be construed or viewed as any type of individual or group recommendation. Be sure to first consult with a qualified financial adviser, legal and/or tax professional before implementing any strategy discussed herein.

Back-tested performance is purely hypothetical, does not reflect actual trading in clients' accounts and may not reflect the effect that material economic and market factors may have had on the adviser's decision-making had the adviser actually managed client funds during the periods presented.

Actual performance of client portfolios may differ materially due to the timing related to changes in investment strategies, contributions or withdrawals and the actual deployment and investment of a client portfolio, the reinvestment of dividends, the length of time various positions are held, the client's objectives and restrictions, and fees and expenses incurred by any specific individual portfolio. The hypothetical results do not reflect the fact that individually managed accounts may not be as broadly diversified as the benchmark. The index results do not reflect the results of actual trading but are achieved by means of the retroactive application, certain aspects of which may have been designed with the benefit of hindsight. Hypothetical past performance is no assurance of future results. There is no guarantee that a strategy's objectives will be realized.

Benchmarks: The index / indexes used by LIA have not been selected to represent an appropriate benchmark to compare an investor's performance, but rather are disclosed to allow for comparison of the investor's performance to that of certain well-known and widely recognized indexes. Indexes are typically not available for direct investment, are unmanaged and do not incur fees or expenses.

PAST PERFORMANCE IS NO GUARANTEE OF FUTURE RESULTS. It should not be assumed that recommendations made in the future will be profitable or will equal the performance of securities in this list or past hypothetical performance.

Not FDIC insured. All investment strategies have the potential for profit or loss.
