

Great minds think a lot.

Our global research solutions are based on academic studies, science, and innovation developed by our team of Ph.D.s and other highly credentialed subject matter experts in accounting, economics, statistics and finance. Augmenting our in-house expertise, we provide an outside network of Ph.D.s to assist in delivering red-flag reviews of issuers, project based consulting, and educational seminars for clients.

Gradient Analytics

Since 1996, Gradient Analytics has delivered best in class research intelligence, providing a comprehensive perspective on generating alpha and managing risk. We provide an unmatched grouping of global research products and services, including analyst-driven research reports; a high-alpha, low-correlation suite of quantitative models, and project-based consulting.

Gradient publishes academically rigorous, unbiased, objective insights into the financial performance and equity valuation of more than 15,000 liquid publicly traded companies globally. Our analysis reliably and consistently identifies key indicators of underperformance and outperformance.
