OUR STORY

InState Partners helps businesses expand their operations into new states as well as introduce and promote innovation within government. Since 1999, we've pursued and achieved legislation and government contracts for our clients throughout the country. We bring extensive experience in all aspects of state government affairs and find creative solutions for the most complex issues facing successful companies.

Our unique approach sets us apart. Having fought and won tough battles many times over, we know the recipe for success consists of astute strategists with a macro view and expertise in running campaigns as well as local consultants with daily presence and policymaker interaction.

The InState Partners team is simultaneously internal and external: with a small group of strategists at its core, we also retain local lobbyists in 47 states. As a result, clients know they can rely on our flexibility, speed and reach for all their state-level needs.
