Investment Process

Qplum uses artificial intelligence, specifically deep learning, to analyze long-term datasets and identify relationships that may lead to consistent risk-adjusted returns. We identify macro regimes and 'learn' how various strategies behave in those regimes. Our portfolios are dynamically allocated across multiple strategies and asset classes under various regimes with robust risk management.

Please read the following important information below regarding the use of this section of the website. This Important Information, the Terms and Conditions (accessible by clicking on the 'Terms and Conditions' link at the bottom of each page of the website), and our Privacy Policy (accessible by clicking on the 'Privacy Policy' link at the bottom of each page of the website) apply to your use of this section of the website and the Legal Terms and Conditions of this section of the website.

The portfolio is implemented using proprietary execution algorithms to reduce transaction costs and increase capacity.

Mansi Singhal, Co-founder and CEO

Mansi Singhal is the co-founder and CEO of qplum, which she co-founded with a mission to make institutional-style investing more widely accessible and affordable.

Mansi has over 12 years of experience in portfolio management and trading. Prior to qplum, Mansi was a Portfolio Manager at Brevin Howard, where she managed \$100 million in global macro strategies. Prior to that, she has held several trading roles at different sell-side banks such as Bank of America, Merrill Lynch and Wachovia.

Mansi also has a Masters degree in Computer Science from the University of Pennsylvania, and a Bachelors of Engineering in Computer Science from MJP Rohilkhand University in India.

Gaurav Chakravorty, Co-founder and CIO

Gaurav Chakravorty is the co-founder and CIO of qplum, which he co-founded with a vision that investing can be approached as a science by utilizing the power of Artificial Intelligence and Deep Learning.

Gaurav has over 13 years of experience in trading and portfolio management. Prior to qplum, Gaurav applied machine learning to trading strategies in a quantitative proprietary trading firm, DV Capital LLC which he co-founded in 2010. Prior to that, Gaurav was the youngest partner at a proprietary trading firm, Tower Research Capital, where he was an early pioneer in machine learning based high-frequency trading, building one of the most profitable quantitative trading groups from 2005 to 2010.

Gaurav also has a Masters in Computer Science from the University of Pennsylvania, and a Bachelors of Engineering in Computer Science from the prestigious, Indian Institute of Technology (IIT-Kanpur).
