

SEC ORDER

Uncompromised Performance

Ultimate goal of attempting to produce positive returns every calendar year.

Risk Management Tool

Ability to invest 100% of assets into cash during broad market declines.

Trend Analysis

Strive to determine the asset classes which may be in bull or bear markets.

Our Methodology

“Creating Wealth by Preserving Capital” is a description of our investment methodology and the stated goal of Sterling Global Strategies. What makes SGS unique is our process that includes cash as an asset class. All of our tactical strategies are managed using a proprietary algorithm which consists of a risk management overlay that can invest 100% of assets in cash during broad market declines. Sterling Global Strategies was created to provide investment options that may significantly reduce downside risk, with the ultimate goal of attempting to produce positive returns every calendar year.
