

Join us and change the way the world sees investing

[SEE OPEN POSITIONS](#)

At Swell, we believe that today's biggest challenges will inspire tomorrow's leading industries. We believe that purpose-driven companies can also be profitable. We believe in a new approach to investing. We're all hands on deck building a product our consumers will love, but we're not done yet. We're looking for hungry talent to help us take it to market and beyond.

This website is operated by Swell Investing LLC, an SEC Registered Investment Adviser. Brokerage services provided to clients of Swell Investing LLC by Folio Investments, Inc., an SEC registered broker-dealer and member FINRA/SIPC. Investments: Not FDIC Insured • No Bank Guarantee • May Lose Value. Investing in securities involves risks, and there is always the potential of losing money when you invest in securities. Please consider your objectives and Swell's fees before investing. Past performance does not guarantee future results. Investment outcomes and projections are hypothetical in nature. Not an offer, solicitation of an offer, or advice to buy or sell securities in jurisdictions where Swell is not registered. Friede, Gunnar, Timo Busch & Alexander Bassen. "ESG and financial performance: aggregated evidence from more than 2000 empirical studies." Journal of Sustainable Finance & Investment, vol. 5, no. 4, 15 Oct. 2015, pp 210-233. <https://doi.org/10.1080/20430795.2015.1118917>. "S&P 500" is an abbreviation for the Standard & Poor's 500 Total Return Index, a market-value weighted index of 500 stocks chosen to reflect the risk/return characteristics of the large cap universe and one of the common benchmarks for the US stock market. The MSCI KLD 400 Social Index comprises companies with high Environmental, Social and Governance (ESG) ratings and excludes companies involved in Alcohol, Gambling, Tobacco, Military Weapons, Civilian Firearms, Nuclear Power, Adult Entertainment, and Genetically Modified Organisms (GMO). The Index aims to serve as a benchmark for investors whose objectives include owning companies with very high ESG ratings and avoiding companies that are incompatible with specific values-based criteria. Comparison to the S&P 500 Index and MSCI KLD 400 is shown for illustrative purposes only. Swell's portfolios differ from these benchmarks in that, among other factors, Swell's portfolios are managed, primarily comprised of small and mid cap stocks, are not diversified, bear fees, and may vary materially in volatility. Past performance is not indicative of future results.

The Swell Impact 400 is not a market index, is not based on any market index, and does not track any market index. At inception, the Swell Impact 400 contains 400 securities; however, the number of securities may vary over time based on market conditions, corporate actions, and other factors, including eligibility factors and limitations in security selection and portfolio construction. Any reference to "Impact 400" shall mean the "Swell Impact 400".
