Strategy Updates (/research?category=Strategy+Updates)

Risk management has been and always will be critical to the strategy's long-term success. Over a market cycle, we continue to be focused on downside protection, capital appreciation and cash flow from dividends to generate attractive absolute and relative returns.

STRATEGY DESCRIPTION

The Day Hagan Logix Tactical Dividend Strategy uses historical absolute and relative yield as an effective, objective valuation metric in making buy, sell, and hold decisions over an industry market cycle.

PRIMARY GOALS

A proprietary quantitative methodology with a fundamental overlay, the strategy is focused on achieving:

- Capital Appreciation
- Downside Protection
- Cash Flow from Dividends

“

Day Hagan Logix is unique among dividend focused strategies, applying yield as an objective valuation metric. Using a disciplined process, the foundation of which hasn't changed since 2002 inception, the strategy seeks to identify trough valuations on an industry and underlying equity basis.”

— Robert Herman, Portfolio Manager
