## You Are the Reason We Built Arkadios Capital

Arkadios Capital was founded by advisors for advisors. We are a boutique firm, catering to experienced advisors whose success has propelled them to the top ranks of their BD's—only to be confronted by a “one-size-fits-all” mentality that permeates larger firms today.

## A Hybrid BD/RIA: You Decide What's Best for Your Practice

Arkadios Capital is dual-registered as both a Registered Independent Advisor (RIA), and a Broker-Dealer. This provides you with the flexibility to operate both a fee-based and a commission-based practice. Our advisors may choose to maintain or establish their own RIA firm, or they may operate under our corporate RIA, Arkadios Wealth Advisors.

## Direct Institutional Access

We offer access to a broad spectrum of investment solutions, covering all asset classes. This includes direct access to leading global alternative investment firms that encompass private equity and real estate funds, hedge funds, credit funds, structured products, oil & gas, managed futures and 1031 offerings.

## Compliance — Our size enables tailored solutions

We affiliate with advisors who share our commitment to high standards of professionalism and integrity. These advisors have a proven track record of providing investment advice and financial solutions that are suitable and appropriate. As a boutique firm, our team is able to avoid the “one-size-fits all” approach to compliance, which in turn allows us to work harder to fully understand each client's financial profile.

Wherever you are on your path to independence, our platform  
was built from the ground up with YOU in mind.
