

## Firm Overview

Olympus Peak Asset Management ("OPAM") is an investment manager focused on credit and other event driven opportunities. The OPAM investment and operations team consists of experienced professionals who have all worked together in the past, ensuring consistency of team. The investment team's experience includes corporate, structured, financial and sovereign stressed and distressed investing, with a focus on rotating assets at inflection points in the markets to both long and short investments.

Olympus Peak Master Fund LP is an opportunistic credit fund that aims to provide superior long-term risk adjusted returns through capital preservation and investing in assets with a favorable risk/reward profile. Investments will be in a broad array of industries and strategies, and across the capital structure of companies. The team will employ a dynamic and flexible approach to allocating capital to areas of the market that are less efficient, face limited competition, and where uneconomic sellers exist. The OPAM strategy will emphasize capital preservation, "margin of safety" and returns that are generally uncorrelated with the overall markets.
