Who We Are

By starting with a team that has over 75 years of experience distilled through conservative risk management and intense regulatory insight, we believe that we can offer extensive modeling capabilities, oversight driven by risk limits and tighter attribution. Our key pillars of success include pricing, distribution, risk management & operational excellence. These are areas where we are committed to delivering the very best results to our clients.

EXPERIENCE

Blue Water was founded out of a sheer desire to be and do better. Better than the competition, better for our clients and better than we were yesterday. If you believe that technology is accelerating exponentially, then don't settle for stale static models, antiquated rolodex brokerage models, or hedging models that don't work. By applying common sense principals to Blue Water's custom models, we have been able to provide solutions to our customers that ease the financial, competitive and regulatory challenges present in today's MSR market.
