Mission & Purpose

The Kayne Anderson Capital Advisors Foundation, established in 2011, carries on our effort to support our community through charitable giving and hands on support. This effort has long been an important part of our culture. The Foundation not only produces grants, but helps to encourage our employees to increase their participation and individual giving to charitable activities.

The Foundation seeks to have a meaningful impact by focusing on those non-profit organizations that our employees have demonstrated a commitment and passion to supporting themselves with both their financial resources and time.

Funding priorities of the Foundation include those non-profit organizations that help society's most disadvantaged – whether it be economically, physically, educationally, or socially - become empowered to be more independent and productive for their benefit and of the community at large.
