IG demand would be key to Walgreens buyout

At this late point in the cycle, fixed income investors are on high alert for signs of potential excess in the capital markets, and a proposal for potentially the biggest leveraged buyout (LBO) in history would certainly fall into that category.

US corporate credit demand slows again

The Senior Loan Officer Opinion Survey, combined with financial results from the banks, is probably still the most useful tool we have for gauging the cycle's life expectancy.

Risk well underpinned going into year-end

A number of threats to risk assets have dissipated and could become positive tail risks for markets moving into 2020.

How healthy is the credit market?

One of the few options available to corporate credit investors to generate returns in this low-yield environment is to pick bonds destined for an upgrade. In this Viewpoint, Senior Portfolio Manager Christian Hantel explains how he does it.

Vescore Global Market Outlook November 2019

Capital markets are still being driven by central banks and the hope of reaching an agreement in trade talks. This is our models' assessment of the situation.

Investors' Outlook November 2019: Treats not Tricks

A Halloween fright in the form of a no-deal Brexit or an escalation in the trade dispute has not materialized, so we can now take a look at positive developments, especially in terms of central banks.

Impactology "alla Milanese"

Today is the United Nations' World Cities Day, an occasion to highlight sustainable ways of improving urban life across the globe. We stay closer to home, concentrating on a single European metropolis, Milan, whose attractions would shine brighter if it realized its "green" potential in full.

What Does US Loan Underperformance Mean for Bondholders?

"The European CLO market is much smaller, but given the US is further ahead in the economic cycle, the US market can provide a good indication of what might happen in Europe."
