ABOUT

Stewardship

Osmosis supports the efforts of organisations that promote a holistic view on investment, including better corporate governance and a pragmatic stance on environmental and social issues. Our Stewardship Policy adheres to the UK Stewardship Code. We also follow the CFA Institute Code of Professional Conduct and are members of the United Nations Principles of Responsible Investment. We welcome the efforts of organisations around the world that are working hard to bring about changes in the way that companies interact with their stakeholders and the way that investors assess responsibility and sustainability. We applaud and support organisations like the International Integrated Reporting Council (IIRC) and the Global Reporting Initiative (GRI). We regularly participate in initiatives, discussions, and presentations to this end.
