Aristotle Advisors, LLC Provides Trusted, Independent Financial Solutions for Individuals, Businesses, and Institutional Clients

Aristotle Advisors, LLC provides comprehensive financial advisory services through Envision Financial Transparency's use of unique and patented technology and methodologies for individuals, businesses, and institutions that are seeking objectivity, transparency, and independence from the traditional financial services industry.

Our goal is to be a part of a national movement to fundamentally change the way financial services are rendered.

We are working to create a client experience that is fundamentally different because our process is fundamentally different - a clean, transparent and empowering process. This process helps remedy two principle concerns caused by a "lack of transparency" in the traditional investment advisory process. These problems are:

1. Artificial constraints upon access to various mutual fund and private account money managers
2. The incentive-influenced, preferential recommendations of certain mutual fund and private account money managers
