Our Roots Run Deep in the Middle Market

Ironwood Capital is a Connecticut-based private equity firm that provides non-control growth capital to middle market companies, investing more than \$700 million in over 125 companies over the past 16 years. Ironwood invests in the form of subordinated debt and preferred stock in

amounts ranging from \$5 million to \$20 million to support business owners and financial sponsors in growth financings, full and partial recapitalizations, generational transitions and buyouts. With over 30 years of middle market experience, we seek to simplify a process that is often unnecessarily wrought with complexity and contention.

We help you do what you do best.
