Chapter 5: Retirement

Pyramid of Success—Savings HierarchyPage 58

You have some money to set aside, but what are you going to do with it? You're not alone in not knowing how to put your money to work. It is so common an inquiry, in fact, that just searching "where should I put . . . ?" prompts an eerily clairvoyant online search to know that you probably want to ask where to put your money (immediately followed by where to put your subwoofer, but we can't help you with that).

Most savers are probably looking for investment help, but what you should really determine first is, (1) if you are in a financial position to be investing, and (2) if so, the type of account in which you should invest.

The number-one priority for extra cash is paying off bad debts (for example, credit card debt), followed by establishing an adequate emergency fund, and then saving for retirement. Where to save for retirement might be confusing, given the number of factors to consider (account types, tax implications, employer contributions, etc.). If you are prepared to begin saving for retirement, the corresponding pyramid provides the generally accepted order for where to put your next saved dollar.
