*The Quant Pros*

## Welcome to TWIN

In your search for an investment manager, you look for a record of measurable results, consistency, continuity and sensitivity to your investment goals and constraints. You also look for a commitment to superior client service.

For many institutional investors, these criteria have been found at TWIN Capital Management. We manage money for institutional investors — corporate and public pension plans, foundations and endowments, Taft-Hartley plans, healthcare organizations, and banks – as well as family offices.

At TWIN, we work with methodologies developed by the team that has led our firm since its founding. Our clients appreciate our adherence to their objectives and the consistency we bring to the investment process. Equally important to them is an investment process that won't be found elsewhere: our quantitative method with its unique [Fundamental Tilt® approach](#).

TWIN Capital prides itself on its commitment to go “above and beyond” expectations. It is one of the reasons we still have clients who partnered with us for over 20 years.
