

About Us

Since 1988, Vermillion Financial Advisors has been committed to providing both personal and business financial planning services for people who sincerely desire to improve their finances. As financial planning and investment services become increasingly complex, we can offer you sound advice to help you find the critical solutions you need for the financial issues you face. We will always take into account all aspects of your finances, including risk, taxes, personal values and current position in life, as we strive to help you achieve your long-term goals.

Vermillion prides itself on providing trusted financial planning and investment services and consultation to high net worth individuals through objective analytical research and consistent investment processes, which we continuously improve and expand.

Vermillion Financial Advisors

Financial Planning

Financial Planning is the ongoing process to proactively address financial issues both large and small that fall within one of the **seven major categories of personal finances**:

- Investments
- Retirement Planning

- Estate Planning
- Insurance Planning
- Major Purchases/Events
- Tax Planning
- Household Cash Flow

All potential solutions and decisions are filtered through the knowledge of your current overall financial picture and long-term goals. Financial Planning helps you make non-emotional but sensible decisions about money that are founded in facts and based on your entire and complete financial picture.

Investment Services

Investment services are a major component of your overall finances.

Your Vermillion Financial Advisor can offer you a variety of investment services; from a comprehensive review of your entire portfolio (To determine your annual investment cost, annual income, tax liability, projected rate of return, level of risk, etc.) to independent research on a desired investment, to education on various investment vehicles you may be considering, to researching the tax implications of a liquidation.

Your advisor will work with you to choose a service plan that provides value for you. You can select one, some, or all of our services. You are in control. Since we do not earn any commissions on our investment recommendations and are paid a fee by you for our services, you are free to select only those services that you determine are of value to you.
