ABOUT DRUM HILL CAPITAL

Founded as a multi-family office in 1998, Drum Hill Capital is an investment manager whose global focus, disciplined approach and unique degree of exposure to private markets lends itself to differentiated and proprietary public market insights and opportunities for its clients.

Drum Hill provides investment management and advisory services across asset classes, viewing its concentrated equity portfolios as the cornerstone of the solutions it provides its clients. Quite simply, we believe investors should seek to own equities that have the potential for long-term capital appreciation and buy them at prices commensurate with their quality. Our investment methodology, informed by our diligence in public and private markets around the world, seeks to provide clients with the opportunity to build just such portfolios.
