who we are

Driving certainty through a deeper understanding of investments and human dynamics.

QS Investors is a quantitative asset management firm that was formed in 1999. We became an independent investment advisor in 2010 and became a wholly-owned, independently-managed affiliate of Legg Mason in 2014. We offer investment expertise supported by the resources of one of the world's leading asset managers. As multi-asset specialists, we leverage Legg Mason's global platform by tapping the strengths of each Legg Mason affiliate. As of March 31, 2019 we manage \$19 billion in assets for

both institutional and individual investors.

Our select team of mathematicians, engineers, scientists, finance and investment experts create multi-asset and multi-factor equity solutions that are designed to elevate the certainty of the outcomes we provide.

➤ MISSION & APPROACH

➤ CULTURE

➤ OUR TEAM

what we do

Multi-asset - multi-factor equity - customized strategies built on a deeper understanding of investment and human dynamics. our quantitative approach unites our intellectual and academic precision with the power of data and technology in our quest to elevate the certainty of the outcomes we deliver.

By digging deeper into human behaviors, market dynamics, asset classes, performance factors and big data, QS Investors has built a long track record of innovation.

Our deep insight into human behavior is an important catalyst in our quantitative approach to building multi-asset and multi-factor equity investment solutions that are:

- Systematic and rigorously tested
- Adaptive to changing market conditions

- Diversified across assets, factors, and especially ideas
