arket territory, although macro risks remain in investors' peripheral.

10-Year U.S. Treasury Notes

PAST RESULTS ARE NOT NECESSARILY INDICATIVE OF FUTURE RESULTS. THERE IS NO GUARANTEE THAT ANY INVESTMENT WILL ACHIEVE ITS GOALS AND GENERATE PROFITS OR AVOID LOSSES.

#### PROSPECTUS OFFERING DISCLOSURE

Investors should carefully consider the investment objectives, risks, charges and expenses of the Longboard Managed Futures Strategy Fund and the Longboard Alternative Growth Fund. This and other important information about the Funds are contained in the prospectus, which can be obtained at <http://www.longboardmutualfunds.com> or by calling 855-294-7540. The prospectus should be read carefully before investing. The Longboard Managed Futures Strategy Fund and the Longboard Alternative Growth Fund are distributed by Northern Lights Distributors, LLC, a FINRA/SIPC member. Longboard Asset Management, LP, is not affiliated with Northern Lights Distributors, LLC.

#### MUTUAL FUND RISK DISCLOSURE – WAVIX WAVEX

Mutual funds involve risk including possible loss of principal. The fund will invest a percentage of its assets in derivatives, such as commodities, futures and options contracts. The use of such derivatives and the resulting high portfolio turnover may expose the fund to additional risks that it would not be subject to, if it invested directly in the securities and commodities underlying those derivatives. The fund may experience losses that exceed those experienced by funds that do not use futures contracts, options and commodities.

Changes in interest rates and the liquidity of certain investments could affect the fund's overall performance. The fund is non-diversified and as a result, changes in the value of a single security may have significant effect on the fund's value. Other risks include credit risks and investments in fixed income securities, structured notes, asset-backed securities and foreign investments. Furthermore, the use of short positions and leveraging can magnify the potential for gain or loss and amplify the effects of market volatility on the fund's share price. The fund is subject to regulatory change and tax risks. Changes to current regulation or taxation rules could increase costs associated with an investment in the Fund.

#### MUTUAL FUND RISK DISCLOSURE – LONGX LONAX

Mutual funds involve risk including possible loss of principal.

those associated with investing directly in securities including leverage risk, counterparty default risk, tracking risk and liquidity. The price of equity security fluctuates based on changes in a company's financial condition and overall market and economic conditions. Investments in ETFs may involve extra expenses and may not perform as expected and may not replicate the performance of the underlying index.

Fixed income securities could lose value due to interest rate changes. ADRs are subject to fluctuations in foreign currencies, political and economic instability, differences in financial reporting, security regulation, trading and taxation issues. The successful use of forward and futures contracts draws on the Adviser's skill and experience in predicting market movement. Risks include imperfect correlation, illiquid secondary markets, unanticipated market movements, counterparty default, and potentially selling securities when disadvantageous to do so. The success of the fund's hedging strategy is subject to the Advisor's ability to correctly assess market performance and correlation of the instruments used in the hedging strategy and the investments in the portfolio.

The fund may trade more, incurring higher brokerage fees and tax liability to shareholders. The fund has a limited history of operation and an investment entails a high degree of risk. Large Cap companies may be unable to respond quickly to new competitive challenges such as changes in consumer tastes. Small Cap and Mid-Cap companies may be volatile and vulnerable to adverse business or economic events. The fund is 'non-diversified' and changes in the value of a single security may have a significant effect on the fund's value. The fund may have investments that appreciate or decrease significantly over short periods. The value of REIT securities may be adversely affected by changes in the value of the underlying property the REIT holds. Short positions may be considered speculative and losses are potentially unlimited.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and

product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics.
