IMPORTANT RISKS

Mutual fund investing involves risks and loss of principal is possible.

Investing in small- and micro-cap funds will be more volatile and loss of principal could be greater than investing in large cap or more diversified funds.

Investing in foreign securities entails special risks, such as currency fluctuations and political uncertainties, which are described in more detail in the prospectus. Investments in emerging markets are subject to the same risks as other foreign securities and may be subject to greater risks than investments in foreign countries with more established economies and securities markets.

Investing in foreign and smaller companies risks may increase the volatility of the funds and the potential loss of principal.
