

Investment Solutions and Family Office Services for Venture Capital and Private Equity Executives

Battery Global Advisors provides customized wealth management within an institutional family office framework. We empower our clients to make confident decisions in order to optimize the impact they have on their personal, professional, and philanthropic endeavors. Between the families we advise and the private funds we offer, BGA manages over \$1.25 billion of assets for sophisticated investors around the world.

Our Family Office Approach

Our Investment Approach

BGA was established to provide investment advice to a group of venture capital professionals. To help them achieve their goals, we have developed a suite of investment options that includes ETFs, mutual funds, and separately managed accounts. The additional private funds we have created deliver access to a broad range of strategies including real estate, private equity, hedge funds, electricity trading, commercial aircraft leasing, and pharmaceutical royalties. We understand the importance of building an institutional-quality investment team and customizing portfolios to meet the specific and evolving needs of our clients.

At BGA, we:

Our Team

Our employees are our greatest assets. BGA's professionals have significant experience in investing, estate planning, tax, accounting, and operations. These diverse capabilities drive creativity and collaboration, enabling our team to stand out as a valuable resource to clients and investors.
