## WHAT WE DO

Solomon API is intensely focused on seeking to  
understand how the world works.

**This pursuit of understanding of the global economy and financial markets, and translating that into great portfolios has help build a distinct track record of success.**

Part of what makes us unique is the value found in our approach of focusing on highly-quantitative modeling. We combine massive amounts of data; world-class computing power and financial expertise to develop sophisticated trading models. And we use technology to constantly refine our investment process and our insight into how the markets will behave. This approach to risk management and having systems in place helps us to find distinctive opportunities, which continues to fuel our growth as a company.

#### INVESTMENT PROCESS

We use technology to impact the lives of our investors.

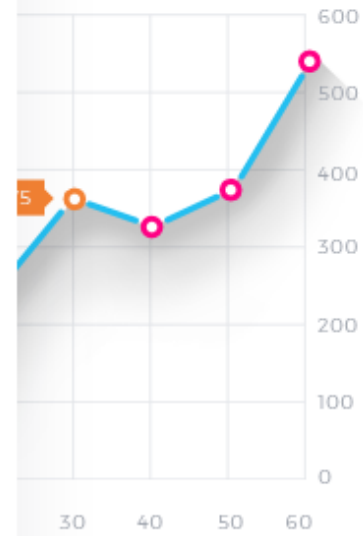

We view what we do as an engineering system that helps make sense of the world. Our philosophy is that the world can be understood through processing data and translating this into highly efficient investment portfolios.

Technology is vital to the advancing of our mission in seeking alpha. Our technologists collaborate with our researchers and managers to design, engineer and run our portfolios, which enable us to meet the demands of our clients.
