

Engaged, Long-Term Partner for Growing Companies

Our Approach

Sageview provides growth capital to leading companies in the technology, financial services, and business services sectors. We combine active ownership, industry experience and a partnership approach to drive long-term value for our portfolio companies and investors.

Working with Sageview

“We were looking for a capital partner that was different from the other firms we had interacted with, and Sageview’s approach stood out. They have been engaged in nearly every aspect of our business – strategic discussions, executive hires, financial planning and monitoring, operational efficiency, board composition to name a few – and have constructively supported our growth initiatives. They are an important part of Avalara’s success.”
