

About Hillhouse Capital

Hillhouse builds businesses that stand the test of time. We look for opportunities around the globe, with a focus on Asia, and have the flexibility to work across the equity spectrum, from seed investments to buyouts and listed equities. Our team deploys technology to drive innovation, with sustainable, long-term growth as the ultimate goal. Over more than a decade, we've worked alongside iconic companies that have redefined their industries, including Airbnb, Beigene, Belle International, Didi, JD, Meituan, NIO, Peet's Coffee, Tencent, Traveloka, Uber, and WuXi AppTec.

We believe that investing and entrepreneurship are two sides of the same coin. Hillhouse not only provides a strategic source of capital to a select group of extraordinary founders, but our teams also incubate, build and operate a number of consumer and healthcare platforms. Hillhouse businesses and operating teams employ thousands of engineers, e-commerce experts, brand managers, talent professionals, and many others. We manage capital on behalf of global institutions such as non-profit foundations and pensions, and we are proud that our efforts help support educational scholarships, scientific innovation, and artistic achievements across the world.
