

BLUE SKY

RESEARCH DRIVEN. RESULTS BASED.

## WHAT WE DO

### Separate Account Manager

We launched Blue Sky in 2013 to provide separate account solutions to institutions and advisors and their clients. Our flagship Dynamic Asset Allocation Strategies broadly seek to enhance risk-adjusted returns in all market conditions by over-weighting risk assets in periods of market strength, and over-weighting defensive assets in periods of market weakness.

### Subadvisory Trading Services

We provide trading and execution services to investment advisors who leverage the portfolio solutions of institutional asset managers and research providers. We implement and trade the investment models on behalf of the advisors to reduce their liability, increase executional efficiency, reduce costs and free up their time and resources to focus on their clients.
