

FOCUSED ON ENERGY

Bluescape Energy Partners is a private investment firm based in Dallas, Texas. We are value-oriented investors focused on the upstream oil and gas and power industries.

Unique Approach. We target established energy companies with attractive growth opportunities and/or debt reduction needs. We position companies for growth and value creation by providing capital and strategic oversight. Our multi-disciplined team has a track record of unlocking overlooked value as investors, executive-level managers, operators, strategic consultants and restructuring advisors.

Long-Term Perspective. Many members of our team have focused on the energy industry for over twenty years. We take a long-term view when investing, having experienced multiple energy and economic cycles. Our professionals have committed over \$1 billion of private equity investments since 2007.
