

# JLL Partners

Disciplined Investing. Value Orientation.

Adding Value +

## INVESTMENT STRATEGY

Founded in 1988, JLL Partners is a private equity firm making control investments in middle market companies.

Where others see complexity, we see opportunity. JLL seeks to add value and insight by sharing our financial and operational expertise with fundamentally strong companies experiencing regulatory, operational or financial difficulties that prevent them from taking advantage of favorable, long-term, secular growth trends in their industry. Over the last quarter of a century, JLL has maintained a consistent, value-oriented investment strategy, focused on building strong companies in partnership with exceptional managers.

At JLL, we strive to operate with honesty and the highest ethical standards. We ensure that our interests are aligned with those of our investors, portfolio companies and employees, working together transparently and openly to achieve our shared goal of growth and value generation.

The firm has long-standing expertise in the healthcare, industrials and business services sectors.

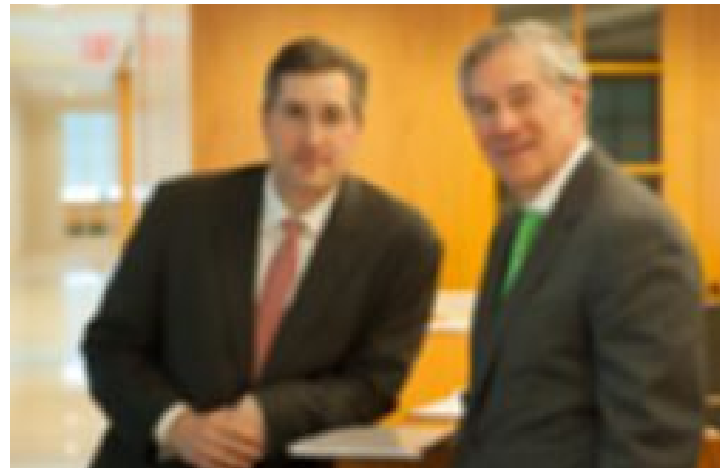

# SELECT PORTFOLIO COMPANIES

Our mission is to partner with strong management teams to build great companies and deliver value to our clients.

## JLL PARTNERS TEAM

Our senior investment team has worked together, on average, for 18 years and has been successful in generating attractive returns across three volatile economic cycles. JLL's investment team is complemented by a team of in-house operating partners (with over 50 years of combined experienced) and a dedicated capital markets professional (responsible for coordinating and overseeing the myriad of debt needs of JLL's portfolio companies).

JLL's policy of promotion from within and its consistency of acquisition strategy keep the firm's culture strong and our goals and objectives clear.
