

We believe in an emerging **data economy** in which more businesses share their anonymous information for a more **efficient society**. Through **creative intelligence, unique partnerships** and the latest **technology**, Trinnacle is at the cutting edge of what the data economy makes possible. Our mission is to be leaders in our field by providing consistent **value for our clients**, while adhering to best-practice principles and transparency.

## Our Approach

Trinnacle's unique approach stems from its belief in technology and innovation combined with the principles of investment management. At Trinnacle, (big) data comes first: Our big data investment strategies are created from the top down by being the first to find new data sets that translate into customized trading strategies. Trinnacle harnesses the powers of efficient cloud computing, machine learning and artificial intelligence to make smart investment decisions, thereby providing value to our clients.

## Investment Management

While our ideas are driven by the latest technology, we never lose sight of our objective to optimize risk adjusted returns for our clients. This is why newly developed strategies go through a series of internal testing and risk assessment before they are deployed on a

fund level. We have systematically categorized different types of trades into distinct investment series to track their performance.

## New York City

Trinnacle has offices in New York City, the most vibrant financial center in the world. We get to work with some of the best people in their fields through our connections to leading universities as well as disruptive startups. We love discussing and deploying the latest and greatest tools with some of the brightest minds.

# We appreciate your interest.
