A Unique Opportunity

Archean is a private market investment platform that seeks to deploy capital with highly qualified teams who are interested in starting their own firms. Archean is focused on opportunities in such specialties as buyout, growth, restructuring/turnaround, and special situations.

Archean's primary objective is to generate enhanced returns for its limited partners through careful fund manager selection and thoughtful investment structuring.

“Investments by Archean will give managers the certainty of a large, initial source of capital for an early first close.”

Archean is able to provide portfolio managers with the initial investment capital, advice and infrastructure necessary to launch new, independent firms. Archean’s involvement should also enhance the manager’s ability to secure additional capital commitments from other investors.

The complexities of researching and successfully investing with emergent private market firms require special skills. Archean’s team has the investment and operations experience to source, diligence and support these firms.
