Access Holdings provides high quality,
investment opportunities for world-
class investors

OUR PURPOSE

We generate attractive, low-volatility
returns for our investors through

systematic, researched-based sourcing, and precise execution.

We aim to buy what we want to own — not just what is for sale. We come to every opportunity with a strong, well-informed point of view centered on having the right strategy, leadership, financial resources and timeline to create value.

Exclusive Access

We provide access to investment opportunities with scalable platform transactions. We are committed to deep alignment with our partners and to providing focused support to drive each company's success.

Targeted Holdings

We pick our spots with care. Each investment platform we pursue is innovative in its approach and capable of supporting significant capital investment.
