

# Advisory

Fairfield, Bush & Co. offers domestic and international common stock portfolios, along with active fixed income management programs.

Given our capabilities within both the equity and fixed income markets, clients who prefer to structure their portfolios in a balanced (both stocks and bonds) manner can be easily accommodated.

# Investments

Fairfield, Bush & Co. has provided discretionary wealth management services to high net worth individuals and Institutions since 1973, throughout the U.S.

Using a disciplined, active approach, we manage individual client portfolios to preserve and enhance the purchasing power of capital.

# Strategy

Client portfolios are managed to preserve and enhance the purchasing power of capital over stock market returns. The goal is to protect capital during periods of market downturns and to increase returns over the long term and after taxes during periods of market upturns. Attempting to time the market during periods of volatility can lead to excessive risk and is contrary to our philosophy.
