

Monitor Clipper Partners is a middle-market private equity firm. Since our founding, we have invested approximately \$2 billion in 45 companies throughout North America and Europe, partnering with founders and management teams to build successful businesses.

MCP's strategy is to focus on investments in which the Firm and its professionals have the opportunity to support founders, owner-operators, and management teams in transformational business-building programs. MCP is generally the first institutional capital provider to these companies.

Monitor Clipper Partners was founded with a vision to help founders of profitable, middle-market companies to further develop and maximize the value of their businesses.

Our investors include leading public and corporate pension funds, financial institutions, insurance companies, college endowments and affluent individuals.
