Miller Tabak Asset Management is a registered investment advisor dedicated to managing high quality municipal bonds for sophisticated investors and institutions.

The MTAM team focuses on purchasing municipal credits exhibiting improving credit characteristics while maintaining geographic and economic diversity as key elements in the portfolio construction process. MTAM believes proactive total-return portfolio management offers greater potential rewards in an increasingly inefficient municipal bond market. Achieving reasonable and consistent growth of our clients' capital without taking elevated levels of principal risk is our objective.

The municipal bond market is a unique sector within the domestic fixed-income universe consisting of over 48,000 issuers with unique security structures and varying credit risks. We seek to exploit these nuances through a disciplined risk-controlled relative value investment management process.
