Money Management

If you do not have the time, expertise, or discipline it takes to succeed in today's difficult stock market environment, then our professionally managed accounts may be just right for you.

The Chartist Newsletters

Real Money Portfolios... Nothing Hypothetical has always been the cornerstone of our publications. What exactly does this mean?

It means we invest our own money right along with yours. In short, editor, Dan Sullivan "puts his money where his mouth is" - a bold stance that signals confidence in his investment style and a trait that separates him from most of his contemporaries.

The Chartist tells you exactly when to buy and when to sell with a proven strategy that we have used successfully for over 50 years.

When we make recommendations we give you the name and ticker symbol of the stocks or mutual funds and the allocation percentage. All of the information is posted on our hotline, after the market's close. **This allows you to act on the next day's opening at the same time we act for the Chartist real money accounts.**
