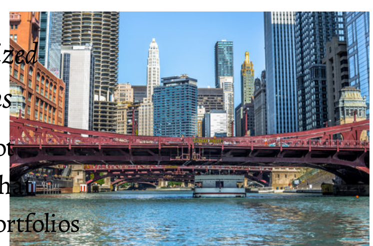
Our Approach

We have access to advanced research technologies that allow us to help our clients find the plan that will be most beneficial to each of them. We incorporate current thoughts on the economy and markets to ensure our clients are getting the most up-to-date advice. Additionally, we take the time to walk clients through and manage portfolio risk and transparency.

Investment Process

We involve clients in our decisions and mutually develop an investment plan to manage your goals. We use our investment process to collaborate with you on a investment plan tailored to your needs and accomplish your goals. We believe in following a unique method of tailoring portfolios to meet the individual investor objectives.



Customized Solutions

We do not believe that model portfolios or, one size fits all, is consistent with our mission to provide a high level of client service and customization to each portfolio. Because each client has a unique set of

objectives,
Optimum
constructs each
