

## Global and Local

With offices around the world, Southeastern's global investment team identifies undervalued companies and chooses only their highest-conviction investments for portfolios.

## Value Investing Since 1975

Since 1975, Southeastern Asset Management has been a leader in value equity investing. The key to our decades-long success has been high-conviction investing with a long-term time horizon in strong businesses with good people at deeply discounted prices.

We created the Longleaf Partners Funds in 1987, as a way for our employees to invest alongside our clients - a partnership tradition that continues today. As the investment advisor to Longleaf, we focus on protecting capital from permanent loss, while also delivering strong absolute returns for our partners and ourselves.
