Who We Are

We are financial planners and investment managers. For over twenty five years Pinney & Scofield has worked with individuals and families to help them plan their future and achieve their most important financial goals. People often look for financial planning due to a specific event or problem – college planning, a home purchase, or retirement planning for example. They will stay with an advisor for the long-term only if they receive consistent, thoughtful and conflict-free advice.

We invite you to browse our website and learn about our company and our services. You will discover a fresh, honest approach to financial planning and investing that creates long-term relationships with long-term investors.
