

Welcome to Robbins Wealth Management

Robbins Wealth Management (RWM) is an independent, fee-based investment management company offering wealth management and retirement planning services to families, high net worth individuals, and trusts on either a discretionary or non-discretionary basis.

The niche of RWM is it's ability to manage investments in a non-discretionary capacity. Too often individuals feel they need help with managing their wealth but are uncomfortable with handing over control. We have a solution. Under a non-discretionary agreement, no trading may take place in a client's account without prior verbal authorization, assuring our clients that they have final say on asset selection.

With over 50 years of combined experience in the financial industry, our advisors are well qualified to assist you through life's various challenges.
