

How wealth and relationships are established.

Paragon Capital Management was established to provide professional investment management at a personal level. We do so by managing portfolio's comprised of individual securities. This means your portfolios are invested in a combination of individual stocks, exchange traded funds, individual government, corporate or municipal bonds, preferred stock and money market funds that meet your risk tolerance and income needs.

Furthermore, you will never be placed in a predetermined investment solution. We are structured to provide full customizable portfolios based on your unique needs.

Our Mission

Paragon Capital Management exists to build relationships that transcend generations by providing the highest investment performance and client experience possible through a dedicated focus on individual client goals and a responsibility to our community.

Paragon Capital Management, LLC, is a Registered Investment Advisory with the Securities and Exchange Commission.
