A TRADITION OF INNOVATION CONTINUES

Direxion equips investors who are driven by conviction with ETF solutions built for purpose, and fine-tuned for precision. These solutions are available for a broad spectrum of investors, whether executing short-term tactical trades, investing in macro themes, or building long-term asset allocation strategies. Direxion's reputation is founded on developing products that precisely express market

perspective and allow investors to manage their risk exposure. Founded in 1997, the company has approximately \$13.5 billion in assets under management as of March 31, 2019.

An investor should carefully consider a Fund's investment objective, risks, charges, and expenses before investing. A Fund's prospectus and summary prospectus contain this and other information about the Direxion Shares. To obtain a Fund's prospectus and summary prospectus call 646-798-5735 or [click here](#). A Fund's prospectus and summary prospectus should be read carefully before investing.

Direxion Funds Risks - An investment in the Funds involves risk, including the possible loss of principal. The Funds are non-diversified and include risks associated with concentration risk which results from the Funds' investments in a particular industry or sector and can increase volatility over time. Active and frequent trading associated with a regular rebalance of a fund can cause the price to fluctuate, therefore impacting its performance compared to other investment vehicles. For other risks including correlation, compounding, market volatility and risks specific to an industry or sector, please read the prospectus.

Direxion Shares Risks - An investment in the ETFs involves risk, including the possible loss of principal. The ETFs are non-diversified and include risks associated with concentration that results from an ETF's investments in a particular industry or sector which can increase volatility. The use of derivatives such as futures contracts and swaps are subject to market risks that may cause their price to fluctuate over time. The ETFs do not attempt to, and should not be expected to, provide returns which are a multiple of the return of their respective index for periods other than a single day. For other risks including leverage, correlation, daily compounding, market volatility and risks specific to an industry or sector, please read the prospectus.
